

響應綠能

減少空調使用量

設計有西南向陽台採垂直遮陽、飯店所有窗戶均可開啓。

符合當地地域條件設置吊扇

有效增進空氣對流，同時也達到降低室內熱氣的效益。

飯店整體綠建材使用率高達50%

採用獲得健康綠建材標章認證的水性木作漆料。

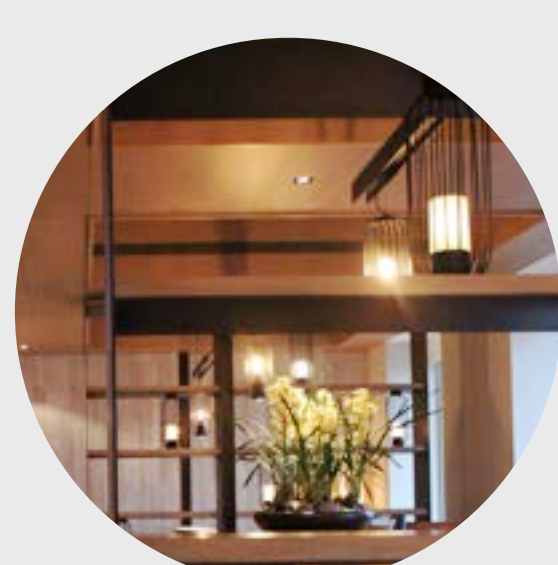

客房內不主動提供瓶裝水

提供水壺贈送給旅客、期望旅客在旅途中為環境盡一份心力。

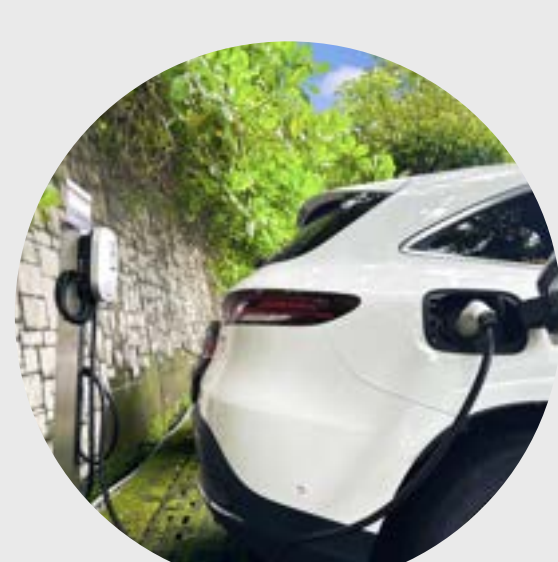

不提供一次性沐浴備品

配合環境部資源循環署推動減塑政策。

硬體機電設備

主要照明採LED燈具、熱水系統採用熱泵，長期使用太陽能熱水設備、空調則採變頻機種、節能電器、有效降低能源消耗。

接駁車和電動車充電車位

減少碳排放，減輕暖化。

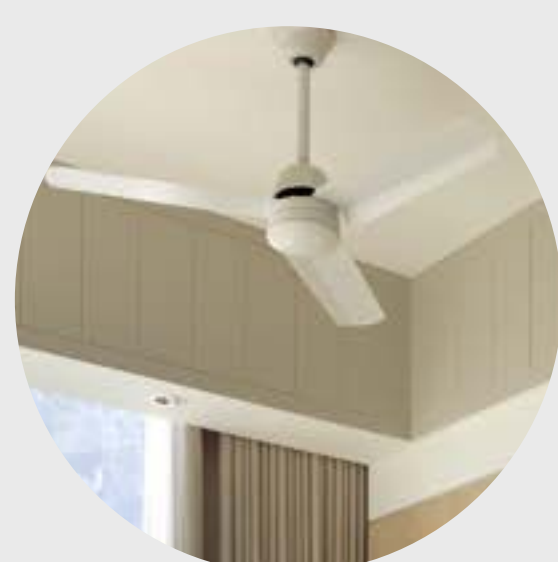

設置中水系統

將生活雜排水或輕度使用過之廢排水匯集，並經過簡易淨化處理，控制於一定的水質標準後，再重複使用於非飲用水及非與身體接觸之生活雜用水、搭配節水裝置節約水資源，保護環境，希望讓建築達到與自然共生共榮的目標。

Green Energy

We have reduced the use of air-conditioners : balconies facing southwest feature vertical sun-shades, and all windows in the hotel are designed to be openable.

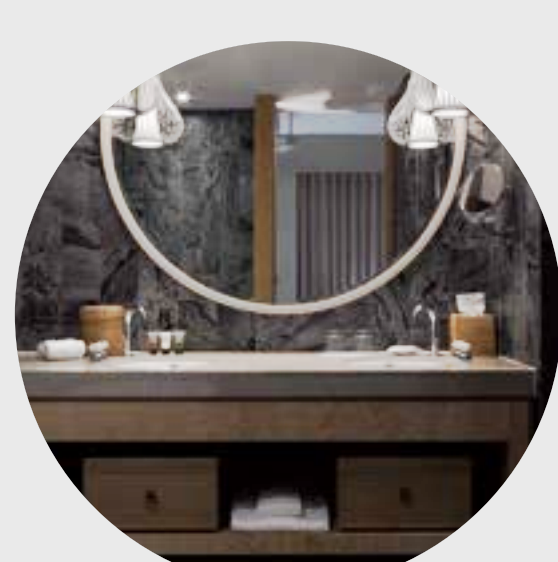

Ceiling fans are installed, conforming to local conditions, to increase air convection and effectively reduce indoor heat.

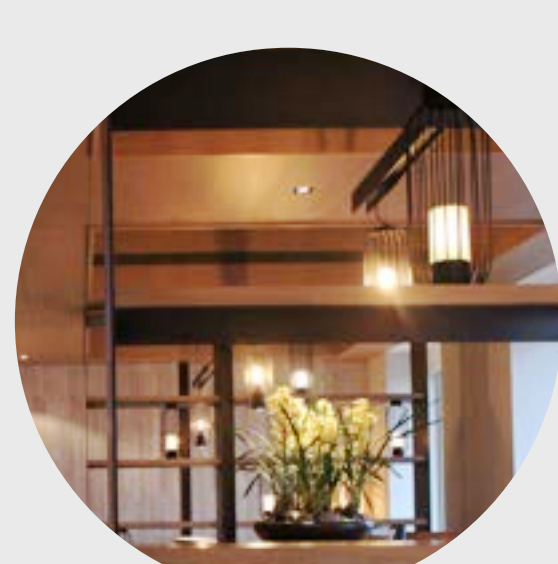

The overall use rate of green building materials in the hotel exceeds 50%; we use water-based wood paint certified with the Healthy Green Building Material label.

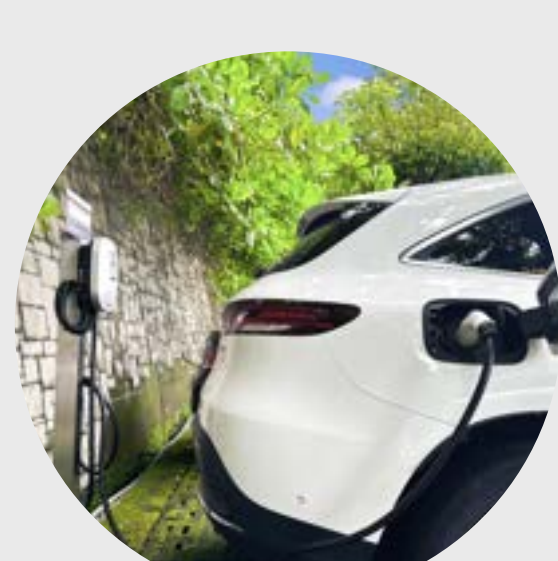

Bottled water is not provided as a matter of course in our guest rooms; instead, we gift each guest a reusable water flask to encourage environmental responsibility during their stay.

Single-use shower amenities are not supplied in the bathrooms, in line with the Environmental Protection Administration's plastic reduction policy.

With regard to hardware, machinery and power systems, we mainly use LED lighting; our hot water system employs heat pumps and solar collectors; our air-conditioning units are inverter-type; and all appliances are energy-efficient to minimize energy consumption.

We provide a shuttle bus service and dedicated electric-vehicle charging parking spaces to reduce carbon emissions and mitigate global warming.

We have installed a reclaimed-water system that collects gray water or lightly used wastewater, subjects it to simple purification and quality control to meet set standards, and then reuses it for non-potable and non-body-contact applications. This is complemented by water-saving fixtures to conserve water resources, protecting the environment and striving for co-existence and co-prosperity with nature.
